## SUBJECT INDEX

### Acetaldehyde

Dissociative adsorption process of acetaldehyde on Pt (*h,k,l*) basal surfaces. An EHMO study, 379

### Acetamidoxime

Ab initio calculation of protonation and lithiation energy of acetamidoxime, 473

### Acetylene

Theoretical study of the formation of cyclopropenyl cation from CH<sup>+</sup> and acetylene, 443

### Amidine

Amidine decomposition mechanism. A theoretical study, 465

### Amine oxidases

PQQ or TOPA? A theoretical suggestion for the organic cofactor of amine oxidases, 533

### Aragonite

A theoretical study of the spectrum of 3d<sup>n</sup> ions adsorbed on ionic crystals. II. Co<sup>2+</sup> on calcite and aragonite, 301

### B<sup>+</sup>

Improving the one-electron states of ab initio LCAO-GTO calculations in momentum space. Application to Be and B<sup>+</sup> atoms, 145

### Be

Improving the one-electron states of ab initio LCAO-GTO calculations in momentum space. Application to Be and B<sup>+</sup> atoms, 145

### Bond analysis

Diatomic energy partition as a tool for bond analysis, 335

### Butadiene

AM1 study of the cycloaddition of singlet methylene to butadiene and the vinyl-cyclopropane rearrangement, 493

### ( $\eta^4$ -Butadiene)M(CO)<sub>3</sub> complexes

Molecular graphics investigation of the addition of nucleophiles to ( $\eta^4$ -butadiene)M(CO)<sub>3</sub> complexes (M = Fe, Co<sup>+</sup>), 343

### Calcite

A theoretical study of the spectrum of 3d<sup>n</sup> ions adsorbed on ionic crystals. II. Co<sup>2+</sup> on calcite and aragonite, 301

### Casual propagators

Memory superoperator representation of projected one-particle casual propagators, 71

### CH<sup>+</sup>

Theoretical study of the formation of cyclopropenyl cation from CH<sup>+</sup> and acetylene, 443

### Co<sup>2+</sup>

A theoretical study of the spectrum of 3d<sup>n</sup> ions adsorbed on ionic crystals. II. Co<sup>2+</sup> on calcite and aragonite, 301

### Coronene aggregation

Molecular aggregation of polycyclic aromatic hydrocarbons. A theoretical modelling of coronene aggregation, 429

### Correlation energy functionals

Results of the correlation energy functionals versus the wavefunction type, 1

### CuCH<sub>4</sub><sup>+</sup>

Bonding in the CuCH<sub>4</sub><sup>+</sup> and FeCO<sup>+</sup> cations, 43

### Cyclopropenyl cation

Theoretical study of the formation of cyclopropenyl cation from CH<sup>+</sup> and acetylene, 443

### d<sup>n</sup> ions

A theoretical study of the spectrum of 3d<sup>n</sup> ions adsorbed on ionic crystals. II. Co<sup>2+</sup> on calcite and aragonite, 301

### Diabatic approximation

The diabatic approximation in the classical frame, 117

### Diatomic energy partition

Diatomic energy partition as a tool for bond analysis, 335

### Diatomic molecules

Regional virial in diatomic molecules: two criteria for defining zero-flux dividing surfaces, 125

- Diatomic molecules**  
A numerical procedure to obtain accurate potential energy curves for diatomic molecules, 135
- Diatomic molecules**  
Finite-field fourth-order MBPT calculations of dipole moments, field, and field-gradient polarizabilities of diatomic molecules, 191
- Diffuse functions**  
On the use of diffuse functions for describing dissociative electron transfer reactions, 51
- Dissociative electron transfer reactions**  
On the use of diffuse functions for describing dissociative electron transfer reactions, 51
- Electromagnetic fields**  
Random phase approximation response of molecular systems to electromagnetic fields: a very preliminary investigation of choice criteria for Slater-type basis sets, 77
- Electron-molecule collisions**  
A parameter-free adiabatic potential as a probe for electron-molecule collisions, 99
- Electron transfer reactions**  
On the use of diffuse functions for describing dissociative electron transfer reactions, 51
- Electrostatic energy**  
A practical approach to the computation of the electrostatic energy in large molecules, 31
- Ethanedial**  
Conformational properties of ethanedial in aqueous solution as described by the continuous model of the solvent, 287
- FeCO<sup>+</sup>**  
Bonding in the CuCH<sub>4</sub><sup>+</sup> and FeCO<sup>+</sup> cations, 43
- Graphite furnace surface**  
Theoretical modelling of molybdenum interaction with a graphite furnace surface, 387
- GTO wave functions**  
A new procedure to obtain GTO wave functions and to analyze their quality, 21
- Helium atom**  
Polarization functions for the calculations of polarizability and hyperpolarizability. Application to the helium atom and the hydrogen molecule, 177
- Histamine H2-receptor**  
A proposed topography for the histamine H2-receptor from structural AM1 calculations, 505
- H<sub>2</sub>O**  
Comparative ab initio and semi-empirical study of hydrogen bonded complexes of NH<sub>3</sub> and H<sub>2</sub>O, 315
- Hydrogen fluoride dimerization**  
Ab initio BSSE-EICP calculations of thermodynamic properties on linear hydrogen fluoride dimerization, 219
- Hydrogen molecule**  
Polarization functions for the calculations of polarizability and hyperpolarizability. Application to the helium atom and the hydrogen molecule, 177
- Hydroxypyrones**  
Influence du solvant sur la stabilité des hydroxypyrones. I, 359
- Hyperpolarizability**  
Polarization functions for the calculations of polarizability and hyperpolarizability. Application to the helium atom and the hydrogen molecule, 177
- Ionic crystals**  
A theoretical study of the spectrum of 3d<sup>n</sup> ions adsorbed on ionic crystals. II. Co<sup>2+</sup> on calcite and aragonite, 301
- Ionic crystals**  
An algorithm based in Ewald's method to calculate lattice sums in the framework of crystal field theory. I. Application to the calculation of electrostatic potential inside MX ionic crystals, 329
- Iron adsorption site**  
Theoretical calculations for catalytic activation of N<sub>2</sub> on a modelled iron adsorption site, 395
- KO molecule**  
MCSCF determination of the KO molecule ground state. CAS and basis set dependence, 229

**Large molecules**

A practical approach to the computation of the electrostatic energy in large molecules, 31

**LCAO-GTO calculations**

Improving the one-electron states of *ab initio* LCAO-GTO calculations in momentum space. Application to Be and  $B^+$  atoms, 145

**Methylene**

AM1 study of the cycloaddition of singlet methylene to butadiene and the vinylcyclopropane rearrangement, 493

**2-Methylpyridine**

*Ab initio* study of the nitrogen lone-pair proximity effect on a methyl C-H bond in 2-methylpyridine, 271

**Molecular systems**

Random phase approximation response of molecular systems to electromagnetic fields: a very preliminary investigation of choice criteria for Slater-type basis sets, 77

**Molybdenum**

Theoretical modelling of molybdenum interaction with a graphite furnace surface, 387

**Morse oscillators**

Recursion relations for matrix elements and Franck-Condon factors of rotating Morse oscillators, 63

 **$N_2$** 

Theoretical calculations for catalytic activation of  $N_2$  on a modelled iron adsorption site, 395

**Na-like systems**

Relativistic effects on the computation of oscillator strengths for the principal series in Na-like systems, 161

 **$NH_3$** 

Comparative *ab initio* and semi-empirical study of hydrogen bonded complexes of  $NH_3$  and  $H_2O$ , 315

**Nitrogen heterocycles**

A theoretical study of the acidity of nitrogen heterocycles, 481

**Nucleophiles**

Molecular graphics investigation of the addition of nucleophiles to  $(\eta^4\text{-butadiene})M(CO)_3$  complexes ( $M = Fe, Co^+$ ), 343

 **$O_2$  ground state molecules**

Semi-empirical model potentials for the interaction between two  $O_2$  ground state molecules, 307

**One-electron states**

Improving the one-electron states of *ab initio* LCAO-GTO calculations in momentum space. Application to Be and  $B^+$  atoms, 145

**Organic compounds**

Molecular surface calculations on organic compounds. Molecular area-aqueous solubility relationships, 369

**Oscillator strengths**

Relativistic effects on the computation of oscillator strengths for the principal series in Na-like systems, 161

**Perfluoroacetylchloride**

*Ab initio* study of the electronic, vibrational and rotational properties of perfluoroacetylchloride and trifluoroacetaldehyde, 279

**Phenyldimethylthiazines**

Quantum molecular similarity measures and the  $n$ -dimensional representation of a molecular set: phenyldimethylthiazines, 517

**Polarizability**

Polarization functions for the calculations of polarizability and hyperpolarizability. Application to the helium atom and the hydrogen molecule, 177

**Polycyclic aromatic hydrocarbons**

Vibrational modelling in large polycyclic aromatic hydrocarbons, 405

**Polycyclic aromatic hydrocarbons**

Molecular aggregation of polycyclic aromatic hydrocarbons. A theoretical modelling of coronene aggregation, 429

**Poly(furylene vinylenes)**

Theoretical investigation of the electronic properties of poly(thienylene vinylenes) and poly(furylene vinylenes), 243

**Poly(thienylene vinylenes)**

Theoretical investigation of the electronic properties of poly(thienylene vinylenes) and poly(furylene vinylenes), 243

**Potential energy curves**

A numerical procedure to obtain accurate potential energy curves for diatomic molecules, 135

**PQQ**

PQQ or TOPA? A theoretical suggestion for the organic cofactor of amine oxidases, 533

**Proton chemical shifts**

Theoretical comparison of proximate peri and ortho substituent effects on proton chemical shifts, 253

**Pt**

Dissociative adsorption process of acetaldehyde on Pt (*h,k,l*) basal surfaces. An EHMO study, 379

**Pyridine-1-oxides**

Dipole moments and polarizabilities of some substituted pyridine-1-oxides for optoelectronics, 205

**Slater-type basis sets**

Random phase approximation response of molecular systems to electromagnetic fields: a very preliminary investigation of choice criteria for Slater-type basis sets, 77

**SO<sub>2</sub>**

The adiabatic multi-step separation method for vibrational states: application to SO<sub>2</sub>, 91

**Substituent electric fields**

Calculation of substituent electric fields, 261

**Supersonic free jets**

Ab initio characterization of possible dissociation pathways for multiphoton ionization of the water dimer in supersonic free jets, 453

**Tin acetylides**

Electronic structure of tetrahedral tin acetylides by pseudopotential ab initio calculation and gas-phase UV photoelectron spectroscopy, 171

**TOPA**

PQQ or TOPA? A theoretical suggestion for the organic cofactor of amine oxidases, 533

**Transition elements**

Modified relativistic effective potentials for transition elements, 13

**Trifluoroacetaldehyde**

Ab initio study of the electronic, vibrational and rotational properties of perfluoroacetylchloride and trifluoroacetaldehyde, 279

**Vinylcyclopropane**

AM1 study of the cycloaddition of singlet methylene to butadiene and the vinylcyclopropane rearrangement, 493

**Water dimer**

Ab initio characterization of possible dissociation pathways for multiphoton ionization of the water dimer in supersonic free jets, 453

**Wavefunction types**

Results of the correlation energy functionals versus the wavefunction type, 1

**Zero-flux dividing surfaces**

Regional virial in diatomic molecules: two criteria for defining zero-flux dividing surfaces, 125
